Multilayer Film Structure

Saint-Gobain single-use bags are constructed of multilayer film optimized for bioprocess production applications. Film materials are consistent throughout the product range, and are free of materials of animal origin. Offering outstanding biocompatibility, chemical compatibility, barrier and strength properties, Saint-Gobain films meet the most demanding bioprocess applications.

Fluid Contact Layer - Linear Low Density Polyethylene (LLDPE)

Provides outstanding biocompatibility with broad chemical compatibility for safe handling of a wide range of biopharmaceutical liquids.

Gas Barrier Layer- Ethyl Vinyl Alcohol (EVOH)

Provides excellent barrier to the transmission of oxygen and carbon dioxide.

Strength Layer - Nylon

Provides outstanding impact and tear resistance, optimizing overall toughness of the bag.

Tie Structure

Multiple materials provide bonding between layers and add to overall performance of the bag.
